## DIVIDEND AND ASSESSMENT MINES.

of Sunday. Jan. 22.

The following tables of dividend paying and assessment companies for the past year is taken from the compiled statement prepared for Ahern's Combination Mining Directory, and is probably the most complete statement on record. It is a flattering showing for Arizona and other new camps against the hopeless prospect of realizing from investment in Comstock serip.

Notwithstanding the rapid strider with which this camp has gone forward to success during the past year, everything seems to point to an eclipsing boom in 1882. The natural climatic advantages of our country are a prime mover against the northern camps, and capitalists and prospectors who can not operate to advantage in the snow-bound camps at the Sierras and Rockies have come among us by the hundred, and are making their presence felt by the

increase of new and valuable finds and large investments. The mineral resources of this county are simply marvelous, but are only one of the factors that most certainly tend to the rapid advaucement of the business interests of Tombstone. Tributary to our young city in all directions are vast mesas that would afford pasturage for thousands upon thousands of head of stock, rich valleys that only need irrigation to produce bountiful crops and sustain a large population. Within the next few months the cold streams of the Huachucas will be running through our streets. Following the completion of this pipe line will be the erection of mills at the mines. In few weeks at most grading is to be commenced for the railroad from Contention to this city, There is every reason for encouragement in the outlook of the new year, and we predict for Tombstone and its ad jacent camps a progressive era of presperity.

A GRAVE CASE. The report of the coroner's jury on the body of J. Gardner reflects anything but credit upon the sheriff of Cochise county. On the 11th inst. Gardner died in the county hospital from gun-shot wounds inflicted in a railroad camp on the Babarcomari, and on the 13th inst. a coroner's jury was convened on the body. It appearing that the case was an aggravated one, that the deceased had been deliberately pierced with four shots, and that the crime had been committed in the presence of a number of witnesses, the jury adjourned until vesterday in order to obtain witnesses and on the 16th subpœnas were placed in the hands of the sheriff for one Dan Lehay and another man known as Tex John son, two rival saloon keepers. Persuant to adjournment of eight days a coroner's jury met yesterday, and are forced, through the criminal negligence of a ten-per-cent sheriff, to submit to the public the report to be found in our local columns. It is a stench and lasting disgrace to our new and promising county that the ends of justice are thus thwarted by an officer who has an ample corps of deputies, who could, at least, make a return. The Tucson papers of the 20th contain accounts of the killing of a Mexican and American on two succeeding nights, and in this dereliction of duty a new impetus will probably be given to the satanic work in the iron-tie camp, but then, Cochise should be content, for do we not have the inestimable privilege of paying \$120,000 taxation as well as 10 per cent thereon? And should not a lightning calculator whose time and figures in the early days of Yavapai are unequalled in estimation of apportionment of representation be a sufficient boon? Our blessings are many and we should

#### ANOTHER RAILROAD COMPANY To the Rich Mines of the Santa Catarinas, the Coal Fields and the Tim-ber Lands of the North.

From the Citizen, January 20.

Another railroad project is on foot which promises to add to the importance of Tucson and bring our city in direct communication with the rich mines of the Santa Catarinas, the extensive coal fields on the Deer Creek, and the timber lands in the northeastern portion of the territory.

Dr. K. Kane, whose means and en-terprise are always on the lookout for projects which tend to develop the great resources of the territory and profitably employ capital, is earnestly engaged in pushing this movement. The company which is to take this matter in hand propose to build a three-foot gauge road along the route now traveled by the Santa Catarina stage line round the point of the mountains to the Oracle mine, where, in addition to the mines in the vicinity, ex-Mayor R. N. Leatherwood, who is also actively furthering the project, has a large ranch. From the Oracle camp the road will be run by the most feasible route to the American Flag mine; from the American Flag to the camp of the Santa Catalina Copper Company; from that point, over the road already built by the Santa Catarina Company to the San Pedro valley; down the valley to the Gila river; up the Gila to the mouth of Deer Creek and from thence to the coal fields where numerous coal fields have been secured by the projectors of this enterprise.

It is the further intention of this company, as we are informed, to continue the road until it reaches the Atlantic & Pacific.

This line will open up one of the richest mineral sections in the territory pass through rich river valleys, bring the coal fields into direct communication with the mines which need their product to extract bullion, and also bring in the timber of the northeast to supply the destitute sections of the southwest.

It will also, if constructed to the Atlantic & Pacific, give us an eastern outlet which will benefit every miner's interest of this city and the country through which it is projected. We are informed that a number of our leading business men and capitalists are backing this scheme, and that eastern capital has already considered the project favorably.

#### SATAN'S GUEST.

He Plays His Last Trump Before an Indignant Nation.

And Breaks Down With a Rational Sob of Remorse.

The Slaver of Garfield Adjusting His Neck to Disgrace Hemp.

Washington, Jan. 21 .- Upon entering the court-room this morning Guiteau took a seat in the witnessbox, remarking as he laid out his paper: "I sit down because I can speak better, not that I am afraid of being shot. This shooting business s getting played out."

At an intimation from Judge Cox

the prisoner carefully arranged his glasses and with a flourish began to read from his manuscript. After reading the introduction, which consumed several minutes, Guiteau took up a newspaper and proceeded to read to the jury his published speech. His manner to the casual observer seemed completely self-possessed, as usual; but behind the ostentatio s affection of composure of feelings which were only held in control through undoubted strength of will, his excitement was betrayed by a slight hectic spot high up on each cheek of his usually colorless face, and by the unusual deliberation with which he began and for some five minutes continued to speak. Whether the excitement was from the merely superficial effect upon his mind of the emotions naturally incident to such an occasion, or whether it proceeded from the despair and more overpowering influence of the true realization of his position as an almost convicted murderer pleading for his ife, it were difficult to divine. Whatever the original character of the feeling, it finally gained ascendency ever his powers of control, and, as he reached that part of the speech which begins, "I have always served the Lord, and whether I live or die" -broke down completely, stopped, tried to choke down the rising lump in his throat, but found it impossible to keep back a genuine sob. He took out his handkerchief, and buried his face in it a few seconds, wiped his eyes, and with a determined effort started again. He seemed to recover his composure so quickly that some believed the whole effort was manufactured. Mrs. Scoville, his sister, however, thought otherwise. She was deeply affected and wept bitterly for some time. After this incident Guiteau continued to read, occasionally adding brief comments upon the text. As he proceeded all appearance of nervousness gradually wore off, and with the utmost composure and an unction that bordered upon the ludicrous the prisoner read on with attempts at every conceivable form of oratorical, rhetorical and dramatic effect. His description of the taking off of the President was given with stirring effect. At one time, pausing, he leaned toward the jury and, emphasizing with his head and hands, said, with an attempt at head this nation will go down in blood. You can put my body in the

grave, but there will be a day of reckoning." In the most natural manner imaginable, Guitean exclaimed again that the reson he did not take Garfield away two weeks before he did was because he had no authority by authority to remove Mr. Garfield. "When the time did come," he said in an airy tone, "I removed him gently and gracefully. The jury may put my body in the ground, but my soul will go marching on. The slave-holders put John Brown's body in the ground, but his soul goes marching on." Then he chanted most weirdly one stanza of "John Brown's Body," closing with "Glory, glory, Hallelujah!"

Guiteau concluded at 11:25, and apon an announcement by Corkhill that Judge Porter would be unable to speak to day, the court adjourned till Monday.

### Logan on the Gultenn Case.

CHICAGO, Jan. 21.—Senator Logan denies to a reporter that it was by his advice that Reed took part in the defense of Guiteau, as has been stated. He brushes away as inconsequential in a political sense the fact that he said, when the shooting first occurred, and has maintained on the witness stand, that Guiteau was in-

Waifs from Washington. WASHINGNON, Jan. 21 .- John F. Godfrey, of Los Angeles, was to-day admitted to practise in the Supreme court of the United States.

The government prosecution officers, who have been preparing information in the star route cases, have nearly completed their work, and are only awaiting the termination of the Guiteau trial to bring the matter be-

fore the criminal court. There was a large attendance of ladies at the adjourned meeting of the select committee on the rights of

women to-day. Col. W. A. Cook and A. M. Gibson presented accounts to the department of justice for services rendered so far in connection with the star route cases. The amount of

each account is \$75,000. The commissioner of pensions rules that soldiers captured in the line of duty and imprisoned by the rebels, and not since heard from, are presumed to be dead in the line of duty. If sound when captured and disabled when discharged from prison, the disability may be assumed to have occurred while they were in prison.

### The Jeannette Survivors.

The secretary of the navy has just eceived the following telegram form engineer Metville of the Jeannette. Irkutsk, Jan. 18 .- Melville, Don-

enhouer and 21 men are all well. Mellville returned to the Arctic ocean and found a log-book, instruments and four records left by De-Long. No tidings of the second cutter, Lieut. Chipp, up to Novem-

#### Anti - Machine Republicans - Inter-

ber 19th.

NEW YORK, Jan. 21 .- A number of anti-machine Republicans are about to organize, after the Brooklyn Young Men's Republican Club pattern. Many old heads are leading the movement. The first meeting will soon be held. It will be addressed by Joseph H. Choate, Wil liam M. Evarts, Henry Tremaine, F. W. Whitebridge, Dorman Beaton, Jno. Jay, Carl Schurz and Jackson S.

Schultz. A committee of the National Rifle association notifies the committee in England having charge of the international match with the British volunteers that they accept all the conditions proposed by the British, merely demanding th t the position of the riflemen at the 200-yard range be standing instead of kneeling.

#### North Dakota.

WASHINGTON, Jan. 21 .- The subcommittee of the House committee on territories will report favorably to the full committee the bill providing for the establishment of the territory of North Dokata.

LONDON, Jan. 21 .- A telegram rom Marseilles, France, states that the balloon which carried Walthe 10th of December last has been of Powell, in the Sierra Pedros.

#### A Big Blaze.

ATLANTA, Ga., Jan. 21 .- Seven business building and blocks, including the cracker factory, burned. Loss, half a million, partly insured. The loss is divided among several persons in small amounts.

Killed in a Coal Mine. JOLIET, Ill., Jan. 21.-By an exolosion in a coal mine one man was killed and two sereriously injured.

#### Homicide.

SANTA CRUZ, Cal., Jan. 21 .- This morning Scott Taylor gave himself up for killing Edward Allen, a teamster, vesterday on Boulder creek. He claims he acted in self-defense, Allen having attacked him in revenge for having been recently arrested at the instance of Taylor, whom he had whipped. There was no witness to

Railroad Plans and Projects. Boston, Jan. 21 .- A circular will oe issued to morrow from the office of the Atlantic & Pacific railroad, calling for \$16,500,000 for the completion of the road upon such terms construction company and secure the profits to the subscribers. Simultaneously the Atchison, Topeka & Santa Fe will issue a circular notifying the stockholders of their right to

Huntington, of the Central Pacific. s negotiating with the Union Pacific for a joint construction of the line great solemnity, "I tell you, gentle from Mohave, on the Southern Pacific men, just as sure as there is a God in railroad in California, northeast to a junction with the Utah Southern, a branch of the Union Pacific, in southwestern Utah. This would give the Union Pacific system a direct outlet to southern California, and, vy way of the California Southern railroad, to the port of San Diego.

### Ship . reck.

SAN FRANCISCO, Jan. 20 .- Port Townsend, W. T., dispatch: The schooner Carrie Hoyden arrived today having on board the rigging and sails of the schooner Orcas, found sunk off Long Island, one of the San Juan group. The officers and crew are supposed to be lost.

### Down on the Dead-Heads.

DES MOINES, Iowa, Jan. 21 .- The lower house of the legislature have adopted a resolution ordering the railroad commission to investigate the free pass system of the railroads, with a view of breaking it up. The preamble charges that passes are generally used by legislative, executive and judicial officials.

### Mexico's President III.

Mexico, Jan. 21.-President Gonzales has been confined to his bed for the past two days. His frequent through the old wound of his amputated arm.

Foreign Items. HALIFAX, Jan. 21 .- Governor-General Lorne has arrived.

BRISTOL, Eng., Jan. 21.—Burlington Smith, American vice-consul at this place died suddenly of heart disease.

#### Consummate Meanness Corporations have been said to be soul

less, and while this does not always apply, in the case of the Southern Pacific it seems to be a just criticism. A few days since there died at the Grand hotel in this city a young man named Charles Carter, who, from letters found among his effects, had not only been an employe of the Southern Pacific company of long stand. ing, but upon quitting their employ had received strong recommendations of character. Stricken down by sickness, his tunds became exhausted ere Death closed the portals. Friends and strangers here united in doing all they could for the sufferer, and now unite in paying the Southern Pacific \$50 for carrying the remains to California, the management of that rail-road, although fully apprised of the facts, positively refusing to allow this last act of courtesy to a faithful servant.

### TICK! TICK!

Not That It Is Given On Long Time, but Being the Regular Output, like Clockwork, of the Bonanza

Camp.

Nothing Special to Report, Except the Constant Propping of Stamps on the San Pedro and Swear ing of the Teamsters at Overloaded Teams Taking the Grist to Grind.

Regarding the bullion producers of the

camp, there is little new to relate this week. Constant progress in development and regular output of ore to mills is the case with all. One of the best indications of the coming permanent prosperity of the camp is constantly increasing cabins out among the knobs and gulches toward the San Pedro. Owners of valuable properties are beginning to realize that if they would reap the fortunes of mining they must take the risks, and that they can not dispose of holes in the ground at extravagant figures. In the light of the development of this camp up to the present, this is a guarantee of certain coming producers, for instances are exceeding rate where prospects have not improved under development. The most important event of the week was the purchase, on Monday last, of the Contact by Mr. Geo. Hearst from Messrs. King and Clark, who had it under bond from its owners, Mr. Richard Gird and the Schieffelin brothers. The purley Powell to sea from England on chase of this property is doubly important -the entry of one of the shrewdest and found, together with the dead body most successful mining men of this coast, and the consequent opening up of a new section of the camp. This investment of Mr. Hearst's will have more influence on the capital of San Francisco, that seeks mining for investment, than the bullion record of our camp since its inception. That Mr. H. has made a good investment is evidenced by an ore dump of some 50 tons of handsome chloride taken out of the prospect shaft that reveals a strong ledge widening with depth, until at 65 feet the ledge width is seven feet.

#### The C. H. Bassett.

Some time since considerable interes was manifested in the C. H. Bassett claim, one of the oldest locations in the district, and a very high estimate placed on the value of the property, as evidenced in the press at that time, although it was then but a mere prespect. Subsequently the main shaft was sunk to a depth of one hundred feet, and the fortunate owners seem to now have a property rivaling any of the outlying claims. Fellowing down one of the finest foot walls in camp, and the contigvous clay gouge, several bodies of high grade ore were cut at different depths and the hanging wall found, which requires considerable cross-cutting to reach at present depth, the whole bottom being as will avoid the intervention of a highly mineralized and indicating the nearness of a heavy ore body. Several disinterested parties last spring claimed ability to trace the Contention west vein into the Bassett and were very positive in their assertions The property is on the belt running to the old Bronkow mine and has every evidence of being a true fissure vein. Assays run from \$70 to \$400. We are pleased to learn that there is a prospect of the Bassett being soon incor-

### The Evening Star.

The property of this company is situated adjoining the Owl's Nest mine on the west, and runs almost due north. The eastern or southeastern end of the claim is covered with rich float rock, and three veins have been discovered within the Iimits of the Evening Star claim, two of which run in a northeast and southwest direction. Upon one of these, near the eastern boundary, a shaft has been sunk to a depth of 45 feet, showing a well defined ledge right from the surface, and the other ledge traverses the claim from south to north and is 12 feet wide, showing the same mineral as the Owl's nest ledge. Upon this ledge the present development is being done, and the shaft is to-day 69 feet deep, sunk all in the ledge, which is getting more compact and more mineralized every foot as the shaft goes down. From the present appearance this bids fair to be as good as its neighbors.

### Tombstone M. and M. Co.

In the west side shaft the 143 foot level is now in 12 feet, running north, and the 68 foot level 140 feet. From the meager workings of these prospect driftings about 30 tons of ore is being shipped weekly, illness is caused by a bone working averaging from 150 to 190 ounces to the ton. Main shaft, Tough Nut, 300 level east drift in 120 feet, south drift 280 feet. Prospecting drifts in both Tough Nut and Good Enough showing strong ore bodies. Combination shaft ore body strong and rich. Shipping 100 tons daily to mills.

> Grand Central. The main shaft has now reached a depth of sixty feet below the 500 level, being an advance of 30 feet for the week. Stoping is progressing favorably on the 100, 200 and 300 levels, while on the two lower levels cross-cutting from the shaft continues. Usual daily output of 75 tons to

the mill.

Woronoce (San Diege) Mining Co. The ore in the south drift, on the lower level, holds out well and the ledge is increasing in width. Rich carbonates were struck this week in the drift running south from the upraise. The shaft is down 324 feet. The ledge matter is heavily stained and of a nature which indicates close proximity to an ore body.

#### Contention Consolidated. No drifting is being done at present in

the Contention, but cross cutting is progressing from the lowest levels of the Flora Morrison to connect with the 500 and 600foot levels of the Contention, to which stoping is at present confined. Mine look. ing well.

From the 200 level of the Tough Nut the Girard management are sinking a winze (now down 80 feet) to connect with their workings, for better ventilation. Mill about completed and water connec tion with Sulphuret nearly finished.

Bob Ingersoll. East drift of 300 foot level in 56 feet. Ore dump constantly increasing. There

is strong reason to believe that a rangements will soon be made for milling the output of this mine.

On the 132 foot level 50 feet from the shaft in the southwest drift cross-cutting is progressing west through porphyry and

San Pedro.

#### Head Center. Work has been partially suspended until

the termination of the suit now in progress in the district court. Empire

Prospecting is being pushed forward under the new management on the lower level both by cross-cuts and winzes. Vizina.

The ore showing in this mine is excellent, and the output to the mill is on the increase.

Midnight Copper Group, Turquois. Reports from this property continue to trict is found in limestone formation, in much of which iron cap prevails. The former owners of this property year before last sank several shafts, one of which has a depth of 80 feet. In sinking on this shaft at a depth of 30 feet a 21/2 foot ledge of what was at the time by the crospectors, supposed to be iron, was passed through, the ledge pitching into the hill at an angle of 45 degrees. Since the strike of a threefoot ledge of rich oxide of copper ore in another part of the claim, a test of this ore has been made thirty feet from the surface, resulti, g in the discovery that there is a handsome showing at that depth of good oxide of copper, with just enough silicates, iron and limestone to make it run like water. The present owners are to be congratulated.

#### CHEAP ICE.

Company Organized, the Machinery Ordered, and Contracts Hade with

Mr. W. K. Leveridge, to whom our city

owes the credit for an ample supply of cheap water, upon leaving the service of the Tombstone Water, Mill and Lumber company, immediately took steps to again benefit the people of Tombstone, by the manufacture of and supply of cheap ice. In this enterprise he is backed up by several well known San Francisco capitalists. The first step towards consummating his project was to secure the patronage of the heaviest consumers in the city. This was an easy matter, for his price was so liberal that even the least consumer would be saved one-half over former prices. Heretofore they have paid seven cents per pound, and hereafter they will pay but three to three and one-half cents per pound, the rate depending upon the amount consumed. Forty-five of the chief consumers have signed contracts with Mr. Leveridge for a period of one year. It is the intention of Mr. Leveridge to supply families at the same rate that he does other consumers, which will be a great boon, as during the summer season in this warm climate

ice becomes almost a necessity in every household. A three-ton low pressure binary absorpion machine has been ordered from H. Bloomfield, the San Francisco agent of the New York Ice Machine company, who own the French patents for this, the best machine manufactured. The substance used to produced congelation is, as its name implies, a compound of two substances, it being ethylo-sulphurous-dioxide, and does its work by absorption of the latent heat in the water. It freezes solid porated and faithfully worked, as it has too blocks eight inches thick in twenty-four that cut from lakes or rivers.

The works will be built near the city, and will be commenced as soon as Mr. Leveridge returns from San Francisco, which will be in about two weeks, as he leaves this morning for that place. While absent all the details of the company will be completed, and he will return with the boiler, engine and machine ready to set up. Next to bringing in water and reducing the price one half, this is the most important enterprise of a domestic nature that has been introduced into our city, and Mr. Leveridge is deserving the thanks of the entire community for the energy he has displayed since he came among us. When the works are set up the EPITAPH will give its readers a more complete deail description of the process, which is said to be not only the most complete for ice manufacture, but also for the preservation of meats, fruit and other perishable commodities, as it can be applied to large rooms in which such articles are stored.

### THE WINCHESTER DISTRICT.

The First Good News Fully Verified. The party consisting of George Hearst, of San Francisco, J. H. Jackson and George A. B. Berry, of this place, who left for the new discovery at the Point of Mountains, now known as the Winchester district, returned last evening a little after 7 o'clock. Our reporter did not have an opportunity of interviewing Mr. Hearst after his return, but Messrs. Jackson and Berry did not escape the reportorial sagacity. Mr. Jackson submitted a rough, but excellent sketch, of the principal ledge, showing three locations which all show rich mineral at various points. Mr. Jackson says that the showing is good for an undeveloped property, and the mines bid fair to be of great value. All concede the description given by Mr. Berry, after his first return, to have been perfectly accur- 15 cents per square: fourth week's ate. George declares Mr. Hearst to be one of the most philosophic and pleasant traveling companions under adversity that he blanks, per 1000, \$5.50; quart ever met. This is more than could be blanks, per 1000, \$4.50. truthfully said of most mulitoniares. As class they would except all the luxury of the Palace hotel on such a trip. It is a pleasure to note the favorable opinion of this party on the new find. We believe development will show Cochise county to be richer in minerals than any other similar spot in the United States.

#### BILVER SEDDING

Twenty-Fifth Auniversary of

The residence of Mr. E. Sumner

invaded in force last evening by friends of himself and wife, who had mer to celebrate their silver wedding amit-versary. The parlors were elegantly dec-orated with natural flowers, and the pres-ents were numerous and elegant, being composed principally of solid silver arti-cles. A superb ebony dess, with silver furnishings, was presented by Mrs. Sum-ner to her husband, and last, but not least, a certificate of deposit for twenty-five thousand dollars, given by Mr. Sum: ner to his wife. The collation was all that could be desired by the most far ous epicure, embracing all the dealer that could be procured on the Eastern or improve. Most of the mineral in this dis- Western coasts. Toasts were drank in sparkling champagne, and the kindest of wishes exchanged. Some of the responses were brilliant and telling, and at a late hour the guests wended their way homeward, voting it one of the most successful social events which ever took place in Tombstone. Among those present-were Mr. and Mrs. F. S. Earll, Mr and Mrs. G. G. Berry, Mr. and Mrs. L. W. Blinn, Dr. and Mrs. Chapir, Dr. and Mrs. Ingersoll, Mrs. Philip Morse, Mrs. J. S. Clark, Mr. and Mrs. C. D. Reppy, Mrs. Morgan, Miss Locker, Mark McDonald, Prof. Church. W. J. Cheyney, M. B. Clapp, Frank Kingsbury, Geo. S. Rice, W. B. Murray, R. M. Price, C. W. Goodall, Frank Earll, W. K. Mead, G. St. C. Abbott, Judge Lucas, Cant. Seamans, A. S. Stebbins.

#### REPORT OF CORONER'S JURY

We the undersigned, the jury summoned by the coroner of Cochise county to investigate as to the cause and manner of death of the body which has been submitted to our inspection, and who the person was, after viewing the body and hearing such testimony as has been brought before us. find that his name was J. Gardner, age and nativity unknown; that he came to his death in the county hospital of Cochise county, at Tombstone, on the 11th day of January, A. D., 1882, from the effects of gun-shot wounds inflicted by an unknown party to this jury-this jury having no

evidence as to the matter. It further appears, from the evidence or the coroner, that he 'issued subpænas and placed them in the hands of the sheriff of Cochise county for one Dan L ahy and Tex. Johnson, who keep saloons on the Babarcomari, and both of whom reside there within a short distance of the town, and that instructions were given to the sheriff to procure such other witnesses as might give information to the coroner's jury of the cause of death of said Gardner; that said subpænas were placed in the sheriff's hands five days prior to this date; that no return has been made upon said subpornas by the sheriff, and no witnesses have appeared before us, and this jury is unable to render any fuller verdict than as above stated. And this jury believe, in this matter, the sheriff has been derelict in his duty to the people. [Signed], J. F. Hutton, Harvey Wooley, C. J. McLennon, U. D. Goffney, U. H. Wells, Laurence
